ENVD 4365 | Unearthing Materials

Tuesdays and Thursdays | 11:00am – 12:15pm | ENVD 122

Clay Processing | Raquirá, Boyacá, COLOMBIA | Image Credit: Jacob Moginot

INSTRUCTOR DETAILS

Zannah Matson (she / they) | Assistant Professor | zannah.matson@colorado.edu

Office Hours | Tuesday 4:00-5:00pm | Virtual + In-person sign-up: https://calendly.com/zannahmae

COURSE DESCRIPTION

This hands-on seminar dives deep into the world of materials to understand how they shape our designs, and how their extraction and use shape our world. The course works across disciplines to research where materials come from, test their properties, and design and imagine more ecological and just futures. Research in the materials library, go on site visits, and work with materials to reveal how they can be vibrant partners or provocative foes in our design process.

COURSE OVERVIEW

As designers, the materials that we use in both the representation and construction of projects are central to achieving our design intentions, creating spatial atmospheres, and connecting projects to their environments. In addition to the significance of materials to our design process, each material can be understood as a part of a more complex set of relations that connect to particular ecologies, cultural significance, and structures of labor. Starting with significant material categories used in architecture and landscape architecture, this elective will map the connection between materials and their ecological and

cultural landscapes, test material properties, explore commercially available products, and consider the futures of these materials in the context of sustainability and equitable production. The course will make use of the ENVD Materials Library, systematic research on extraction, and consideration of potential future uses and material processes to consider materials across and between scales in ways that weave together their ecological, cultural, and economic values and impacts.

The course is founded in an exploratory approach where you are encourages to thing deep about the materials we engage with and bring enthusiasm for your own work and the work of your colleagues. We will engage with many different labs and resources on campus to understand how our work as environmental designers is related to a whole ecology of other disciplines, research and inspirations. It is my hope that through this course you understand the ways in which current material paradigms are broken, but also have the skills, curiosity, and drive to reimagine what our design futures could be with thoughtful approaches to materials.

LEARNING OBJECTIVES

This course has been designed to support you in learning the following skills and knowledge. If at any point you feel you are struggling to achieve these outcomes while completing the course content and assignments, please reach out to the instructor for support.

1. To critically engage with significant writing on materials and develop well-articulated and supported positions on the critical debates within theoretical materials literature.
2. To engage in shared learning alongside peers in both formal group contexts as well as an informal shared seminar format.
3. To understand and draw out the complex relationships that materials have with sites of extraction, production, distribution, and consumption.
4. To consider the social and ecological impacts of materials and the efforts that are being made to reduce these impacts by contemporary practitioners.
5. To participate in the materials sourcing and selection process.
6. To design and execute material experiments to better understand material properties and speculate on how these properties could be incorporated into designs.
7. To analyze the possibility for alternative material practices and design more sustainable material futures.

ASSIGNMENT OVERVIEW

20% | Throughout + September 29, November 3, Exam Week | Notebook Practice + Participation

In a class of this size, it is super important that you not just show up to class, but that you come prepared for discussion, having done the readings, and ready to dive into the topic of each class. In an effort to better prepare you for in-class participation, you will be required to develop a notebook practice. You will be given a notebook on the first day of class, and in it you will be expected to take notes during class, take notes on the readings, complete activities and extra credit assignments in it and more. **Bring your notebook to class each week.** This practice will develop as the term progresses, and I will do two notebook check-ins during the term where you submit the notebooks for grading, on **September 29, November 3, and at the final presentation during exam week (date tbd).**

Participation will take different forms, from speaking in discussions in class to short written responses in class from time to time that allow you to reflect on the readings and their relevance to class. We'll talk more about these different forms of participation as the course progresses. *To be able to participate*

fully in notebook practice within class, make sure you're always bringing pens and pencils to class as you will use them to write both in class and on your own time as you research and complete readings.

20% | September 22 | Material Ecologies

Working individually or in pairs/small groups throughout the term you will investigate a chosen material of study across scales and timelines. For this first project, you will think of the wider ecological context of the material, both literally and figuratively as it interacts with—and is relation to—other materials, beings, processes, and global events. Inspired by the methods in some of the readings and the video lectures for this module, in this project you will trace the lifecycle of the material as it has developed historically until the present, when it was used most, when it was changed by technological shifts in the world, when it became obsolete etc. You will also map the material, where it comes from and travels to throughout its complex life of extraction and production. Overall, this project will have you considering the web of relations your material exists within.

20% | October 27 | Material Properties

We design with certain materials because of the properties that have. The transparency of glass, the strength and flexibility of steel, the moldability of concrete have all contributed to their ubiquitous use in modern design Working in the same groups, in this module you will obtain material samples, test their properties, and research experiments that have been done with materials to consider the quintessential properties that your chosen material has. You will further explore design precedents that you feel have highlighted these properties and allowed materials to play a central role in design intention.

40% | Exam Week | Material Futures

The final project for this course will bring together revised and improved versions of both the Material Ecologies and Material Properties project and will continue the exploration of your chosen material to consider what more sustainable and just futures it could participate. Some of this project will rely on researching advances in sustainable material innovation and technology, some will reconsider waste streams or material substitution, and some will rely on your own inspiration and familiarity with the material to think of new roles the material can have in the future of design.

SUBMISSIONS + LATE ASSIGNMENTS

Unless otherwise agreed on, all assignments are to be submitted by 10am to canvas on the day that they are due and will be followed by a printed pin up at 11am on the day of the deadline.

Because work will be completed in groups and you are pinning up for reviews of the work, extensions are difficult, but please be in touch with Zannah as soon as possible if you are struggling to meet a deadline to work out alternative arrangements.

EXTRA CREDIT ASSIGNMENTS

It is expected that you attend the three ENVD lectures listed in the course schedule: **Billy Fleming on September 9 and Ronald Rael on November 18th**. Please write notes at the lecture in your notebooks and there will be additional reflection questions to consider following each of these lectures. Each lecture attended and notes + reflection completed in your notebook will count for one additional extra credit grade to be added to your final grade. I will add these into your final grade as I am reviewing your notebook practice at the midterm and final check.

On **September 24th** there is also a self-directed visit to the Eco Materials Library in ATLAS that will be worth an additional percentage point of extra credit. Details will be posted to Canvas.

READINGS

The syllabus lists author names for each required reading, and a PRINTED copy of the reading will be provided to you, unless otherwise noted in class. You are expected to take notes on the readings in your notebooks and are welcome to highlight this copy and write notes on it as well. Please bring this copy to class for reading discussions as screens will not be permitted while we are discussing readings. When the readings are more complex or difficult, I may also add some questions to help you guide your readings on Canvas, please keep an eye out there. In this class there are no written reading responses due, but the readings themselves will form the foundation of many discussions, your notebook practice, and there will also be occasional in-class activities that will ask you to reflect on the readings and submit written reflections in class. It is therefore imperative that you are not only doing the readings before the class they're assigned for and are taking good notes in your notebooks! **Your ability to speak to specifics within the readings each week, and the notes that you take on them will form part of your notebook practice and participation grade.**

COURSE STRUCTURE + SCHEDULE

Week	Date	Topic	Things Due
Week 1	August 20	Unearthing Materials Introduction	Getting to Know You + Syllabus Quiz
Week 2	**August 25** August 27	**Introduction: Material Ecologies** Visit: Introduction to Materials Library	Reading: Sturlaugson + Varkulja
Week 3	September 1 September 3	Visit: Map Library Reciprocal Sites + Bodies	Reading: Hutton + Nina Cooke John
Week 4	September 8 September 9th September 10	Carbon and Climate Billy Fleming Lecture 12:20pm ENVD 134 Pin-Up: Billy Fleming	Reading: Fleming + Riofrancos
Week 5	September 15 September 17	Processing + Pollution Workshop: Material Ecologies	Reading: Misrach + Orff + Wikstrom
Week 6	September 22 September 24	*Material Ecologies: REVIEW* Extra Credit: Visit to the Eco Materials Library	10am to CANVAS 11am Pin-up
Week 7	September 29 October 1	***Introduction: Material Properties*** Visit: CU Boulder Recycling Visit	Reading: Theodoridou et al. *Notebook Practice Check In*
Week 8	October 6 October 8	Online: Smoothness + Plasticity READING DAY!	Reading: Schnapp + Cooperman
Week 9	October 13 October 15	Standardization + Strength Visit: Living Materials Lab	Reading: Curtis + Zeeberg
Week 10	October 20 October 22	Codes + Conventions Workshop: Material Properties	Reading: Velikov et al. + Barthes
Week 11	October 27 October 29	*Material Properties: REVIEW* ***Introduction: Material Futures***	10am to CANVAS 11am Pin-up Reading: Morrow
Week 12	November 3	Designing from the Earth	Reading: Rael

	November 5	Visit: Nova Terra	*Notebook Practice Check In*
Week 13	November 10 November 12	Rethinking Waste Streams Visit: Utility Research Lab	Reading: Lokko + Doyle
Week 14	November 17 November 18 November 19	Breaking + Repair Ron Rael Lecture 12:20pm ENVD 134 Workshop: Biofoam with Caitlin Charlet	Reading: Louterbach + Moe
Week 15	November 23 November 25	FALL BREAK FALL BREAK	
Week 16	December 1 December 3	Course Reflection Workshop: Material Futures	
Exam Week	**December 9-11**	**Material Futures: Final Review**	*Due date to be determined when exam schedule released + Notebook Practice Check In*

GENERAL COURSE POLICIES

GRADING

You will receive grades on each of your assignments that follow a rubric which will be posted alongside the assignment. Please read the rubric to better understand the focus of the assignment and the skills and competencies you are supposed to develop through completing the assignment. I try to return graded work within two weeks of submission, but depending on project length it sometimes takes longer.

The percentage grades that you receive on assignments will be weighted according to their assigned values (listed above). Grades will be converted from percentages to final letter grades using the following scheme.

Letter	GPA	Percentage	Letter	GPA	Percentage
A	4	94-100%	C+	2.3	77-80%
A-	3.7	90-94%	C	2	73-77%
			C-	1.7	70-73%
B+	3.3	87-90%	D+	1.3	67-70%
B	3	83-87%	D	1	63-67%
B-	2.7	80-83%	D-	0.7	60-63%
			F	0	0-60%

INSTRUCTIONAL MODE

Most ENVD courses are held in-person. Course instructors may designate up to 15% of class sessions to be held remotely. Remote teaching can be beneficial to certain instructional methods; for instance, remote sessions might be appropriate for desk crits, guest speakers, juries, etc. The instructor will typically coordinate a remote session at least a week in advance, however in the case of illness, remote sessions may have less advanced notice.

In this course, there is also a zoom link available for the course for you to join remotely if illness or another serious reason prevents you from attending campus. As participation is an important part of this

class, and an important part of your grade, please note that using the zoom link when class is otherwise meeting in person is only to be done in extenuating circumstances as it impacts your ability to engage fully in the class. **Please email the instructor before class if you intend to join using the zoom link.**

COURSE COMMUNICATION

Canvas

Canvas is an online Learning Management Software (LMS) used CU campus-wide and serves as the *primary platform by which course activities take place at ENVD.* Canvas is used for announcements, recording attendance, submitting assignments, posting course materials, and grading. Students are responsible for setting notifications on Canvas so that they are aware of official course activities.

Email

CU student email (<identikey>@colorado.edu) is the official method of communication for ENVD Program alerts and announcements. Instructors may also use CU email to communicate critical course information. Students are expected to check CU email messages at least once every 24 hours to ensure access to critical program and course announcements.

I try my best to respond to emails within 24hours, however depending on the week it can take up to 48 hours to receive a response. Please only send simple questions via email, and for more complicated issues or to receive more in depth help please ask in person before or after class, during class, or during the office hours that I have posted. I'm always happier to talk through complex questions in person. I don't typically check or respond to emails over weekends.

ENVD INCLEMENT WEATHER POLICY

If CU cancels all classes, ENVD will also cancel all classes. If CU opens on a delayed start due to inclement weather, classes that start before the delay will be canceled with the exception of studios. Studios may still meet, provided there is at least one hour of class time remaining after the late start. Faculty will notify their individual sections via email or Canvas of the following:

- If the faculty member intends to cancel studio for that day (including studio lecture component).
- When the course will start and thus students are expected to be present.
  Note: Students unable to arrive on campus safely will not be counted as absent.

In the event of a campus closure, ENVD offices and centers, including the DMC and CLC and the front office, will be closed during campus closures.

ATTENDANCE POLICY

Attendance is a crucial part of your engagement and participation in this class. You should make all efforts to attend class in person. If you are sick or extenuating circumstances prevent you from attending class, please try to attend using the zoom link provided. If you can't attend class, please contact the instructor as early as possible to let them know you won't be able to come to class. Remember that attendance is only one part of your participation and attendance grade and while in class (either remote or in person) the quality of your engagement and participation is most important.

Attendance guidelines:

- The instructor will keep an attendance record and make it accessible to you.
- Two absences within the first three class sessions may result in an automatic administrative drop from the course.

- More than 3 total absences that have not been excused by the instructor during the term will impact your participation and attendance grade in the class (worth 15% of your overall grade for the course)
- Please do not attend class if you are sick. If an illness or other circumstance prevents you from attending more than three class periods, please inform your instructor as soon as possible. Work with your instructor and classmates to catch up on coursework. You may be directed to Disability Services, an embedded counselor, or academic coach for further support.

Late and Partial Attendance Policy:
If you are late to class, please make sure you let me know you've arrived late so I can mark you as present. In some cases, attendance will be recorded through in-class activities that are submitted and if you miss one of these because you are late to class there will be no make-up activity offered.

RECORDING AND WEARABLE DEVICES POLICY

Recording (audio, video, livestreaming, photography, or continuous/automated capture via wearable devices such as Meta/Ray-Ban smart glasses) is not permitted in ENVD courses without the express consent of the instructor and the informed consent of any classmates appearing or speaking on the recording, which may otherwise be a violation of their FERPA protections. Furthermore, live engagement in a course is paramount to a successful learning environment. Exceptions are only for disability accommodations known by the instructor and approved by Disability Services.

ACADEMIC DECISION DEADLINES AND TIMELY ASSESSMENT

Course instructors will typically evaluate and return graded work within two weeks of the assignment due date. To support informed academic decision-making, a meaningful portion of each student's overall grade will be assessed and communicated prior to the University's official Drop/Withdrawal deadlines. If grades or feedback are not available within the expected timeframe, students are encouraged to reach out to the instructor to request an update on their academic progress.

Fall 2025: Last day to…	Drop a course (no penalty)	Drop a course (with a "W")	Withdraw from the term/session
Full Semester Course	9/5	10/28	12/5
Session 1 (7wk) Course	8/28	9/23	10/9
Session 1 (7wk) Course	10/20	11/12	12/4

CLASSROOM ETIQUETTE & EXPECTATIONS

USE OF ARTIFICAL INTELLIGENCE

Some forms of artificial intelligence can help the research process and support strong research outcomes. A good example of this that you are welcome to use within this class is programs such as Grammarly that help with **editing** your written work. Due to the huge environmental impact of generative AI such as ChatGPT—along with its vague and generic writing style—**the use of these programs to complete any part of coursework is not permitted within this class.** As we will discuss in class, ChatGPT it is not a reliable way to search for information because it does not reliably cite where source information comes from. Because all written responses in this class are explicitly trying to help you identify your own values about landscape architecture as well as the shifting values of landscape architecture through history, using generative AI to generate any part of your written responses for projects in this class is not

permitted. I want to hear about what you're thinking of and your own reflections in the assignments you submit in this class! Most often, generative AI written responses are not well-constructed and would receive a low grade at best in this course. If you are suspected of using artificial intelligence tools like ChatGPT to generate your responses for work in this class, you will be in breach of the honor code and reposted for academic misconduct.

USE OF DEVICES IN THE CLASSROOM

Be fully engaged during class. Avoid using personal devices for non-course activities while in class at all times. Most of the things we will do in this class will have you work in your notebooks or from printed pages, so often computers will not be necessary, although sometimes they will be helpful for workshops, so bringing them is recommended.

ENVD STUDENT RESOURCES

TECH SUPPORT

In the event of experiencing technical problems with a personal or CU device, contact CU's Office of Information Technology (OIT) (oithelp@colorado.edu, 303-735-4357).

ACADEMIC SUCCESS AND MENTAL HEALTH RESOURCES

Please reference an extensive list and explanation of resources located at the end of this document entitled "Academic Coaching & Mental Health Resources and Contacts".

ACADEMIC RESEARCH ASSISTANCE

Engineering, Science & Design Librarian Emily Dommermuth is ENVD's liaison for the CU library system. Contact her at emily.dommermuth@colorado.edu or in-person by appointment calendar.

ENVD FACILITIES

Digital Media Center (DMC)
https://www.colorado.edu/envd/facilities-centers/digital-media-center
The DMC is located on the third floor of the Environmental Design building in rooms 305 and 306. Resources available - Equipment checkout (DSLR/mirrorless cameras, PC/Mac laptops, drawing tablets), photography studio, large-format printing & scanning, 3D printing, software & tech troubleshooting. Please see the website for hours and contact info.

Creative Labs Center (CLC)
https://www.colorado.edu/envd/clc
The CLC is located in room 152 in the Center for Innovation and Creativity (CINC) building, which is on East Campus, 1777 Exposition Dr, located on the Route M Marine Express bus route (https://www.colorado.edu/pts/buff-bus-route-map). Please see the website for hours and contact info. Resources available: Wood lab, metal lab, laser cutting lab, 3D printing, CNC routing, computer stations, makerspace, software, technical & mechanical troubleshooting, material sales.

EXHIBITS, COMMUNICATIONS & MARKETING MATERIALS

Student work (physical and digital), in-class and event photography may be used in exhibits, showcases and marketing materials.

ADDITIONAL CU UNIVERSITY POLICIES

INCLUSIVE APPROACHES + DIVERSE PERSPECTIVES IN THE CLASSROOM

We strives to be a community whose excellence depends on diversity, access, equity, and inclusion. We aim to understand and challenge systems of privilege and disadvantage in higher education, such as those based on class, race, ethnicity, gender, sexuality, and dis/ability. We seek to reach across social and political divides and to make space for voices historically excluded in higher education and marginalized in society. In other words, diversity is not just a future reality for which we try to prepare students. It is a priority we want to put into practice here, now, and together, in order to foster places of learning where all members can thrive. Our question for you is, *how are we doing?* Please contact the CMDI diversity team (email dei-cmdi@colorado.edu)

- if you need support or other resources but don't know where to turn
- if any aspect of your educational experience with CMDI does not reflect the commitment expressed here, or if you want to share a positive instance of this commitment in action
- if you have any questions, concerns, or ideas related to diversity
- We want to hear from you so that we can do better, and to support you however we can!

CLASSROOM BEHAVIOR

Students and faculty are responsible for maintaining an appropriate learning environment in all instructional settings, whether in person, remote, or online. Failure to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy.

Additional classroom behavior information:

- Student Classroom and Course-Related Behavior Policy: https://www.colorado.edu/compliance/policies/student-classroom-course-related-behavior
- Student Code of Conduct: https://www.colorado.edu/sccr/media/230
- Office of Institutional Equity and Compliance: https://www.colorado.edu/oiec/

ACCOMMODATION FOR DISABILITIES, TEMPORARY MEDICAL CONDITIONS & ISOLATION

If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to your faculty member in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the Disability Services website. Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further assistance. If you have a temporary medical condition, see Temporary Medical Conditions on the Disability Services website.

If you have a required medical isolation for which you require adjustment, please inform the instructor via email that you're sick and unable to make it into class. Please do not state the nature of your illness when emailing the instructor, that is your personal health information and you're not required to divulge it!

Please try to email before the class(es) you will be absent from, but emergencies happen and if you can't email before class follow-up as soon as you're able. Alternate arrangements will be made with the instructor and absences for illness, disability, or medical conditions won't count towards overall absences in the course.

PREFERRED STUDENT NAMES AND PRONOUNS

CU Boulder recognizes that students' legal information doesn't always align with how they identify. Students may update their preferred names and pronouns via the student portal; those preferred names and pronouns are listed on instructors' class rosters. In the absence of such updates, the name that appears on the class roster is the student's legal name. If you would like to update your name or pronouns at any point during the semester, please inform the instructor.

HONOR CODE

All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the Honor Code. Violations of the Honor Code may include but are not limited to: plagiarism (including use of paper writing services or technology [such as essay bots]), cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty.

All incidents of academic misconduct will be reported to Student Conduct & Conflict Resolution: honor@colorado.edu, 303-492-5550. Students found responsible for violating the Honor Code will be assigned resolution outcomes from the Student Conduct & Conflict Resolution as well as be subject to academic sanctions from the faculty member. Visit Honor Code for more information on the academic integrity policy.

SEXUAL MISCONDUCT, DISCRIMINATION, HARASSMENT AND/OR RELATED RETALIATION

CU Boulder is committed to fostering a productive and welcoming learning, working, and living environment. University policy prohibits protected-class discrimination and harassment, sexual misconduct (harassment, exploitation, and assault), intimate partner abuse (dating or domestic violence), stalking, and related retaliation by or against members of our community on- or off-campus. Denial of an approved accommodation for disability, religious observance, or pregnancy or pregnancy related medical conditions may be discriminatory.

The Office of Institutional Equity and Compliance (OIEC) addresses these concerns, and individuals who have been subjected to misconduct can contact OIEC at 303-492-2127 or email OIEC@colorado.edu. Information about university policies, OIEC reporting options, and OIEC support resources including confidential services can be found on the OIEC website.

Faculty and graduate instructors are required to inform OIEC when someone discloses misconduct regardless of when or where it occurred. This is to ensure that those impacted receive outreach from OIEC about resolution options and support resources. To learn more about reporting and support options for a variety of concerns, visit the Don't Ignore It page.

RELIGIOUS ACCOMMODATIONS

Campus policy requires faculty to provide reasonable accommodations for students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. Please

communicate the need for a religious accommodation in a timely manner. In this class, I have tried to not have major assignments due on days that conflict with religious obligations, but if there is a conflict, I ask that you provide one week notice of the conflict either verbally in class or via email and we can work together to find a workable solution.

See the campus policy regarding religious observances for full details.

ACADEMIC COACHING & MENTAL HEALTH RESOURCES

ENVD ACADEMIC COACHING: https://www.colorado.edu/envd/current-students/academic-advising/academic-coaching
ENVD's academic coaching program promotes the development of healthy and effective academic habits that prepares students to respond to challenges, encourage personal and professional development, and create opportunities for collaborative achievement. ENVD offers academic coaching in one-on-one meetings scheduled through Buff Portal and through partnered events with ENVD's many resource facilities (see ENVD Student Resources Section above).

ENVD Embedded Academic Coach: Sara Freix, Sara.Freix@colorado.edu

STUDENT OUTREACH ADVOCACY AND SUPPORT (SOAS): https://www.colorado.edu/support/soas/
SOAS provides individualized support for students throughout their college career. SOAS takes a holistic, non-clinical case management approach. A case manager supports a student facilitating connections and navigating the resources and services available to them whether on campus or in the community, assisting in students' mental health, emotional wellbeing and safety.

Office: Center for Community (C4C), Suite N460
Email: sscm@colorado.edu
Phone: 303-492-7348

COUNSELING AND PSYCHIATRIC SERVICES (CAPS): https://www.colorado.edu/counseling/
CAPS offers confidential, on-campus mental health and psychiatric services for various concerns such as academics, anxiety, body image, depression, relationships, substance use and more. CAPS is available for virtual and in-person appointments and services.

CAPS ENVD Rep: Melissa Bottiglio, Melissa.Bottiglio@colorado.edu
Office: Center for Community (C4C) 304
Phone: 303-492-2277 (24/7 support)

THE OFFICE OF VICTIM ASSISTANCE (OVA): https://www.colorado.edu/ova/about-ova
OVA provides free and confidential information, consultation, support, advocacy, and short-term counseling services to University of Colorado Boulder students who have experienced a traumatic, disturbing or life-disruptive event. Up to 6 counseling sessions per academic year are available, with unlimited advocacy. OVA is here to help and is incident specific.

OVA ENVD Rep: Jessica Ladd-Webert, jessica.ladd-webert@colorado.edu
Office: Center for Community (C4C), Fourth floor, Suite N450
Phone: 303-735-2323
